

Mary Ruckelshaus, Ph.D.

Mary Ruckelshaus is a research biologist with NOAA Fisheries in Seattle. She leads the salmon risk and recovery science group at the Northwest Fisheries Science Center and currently chairs the Puget Sound Technical Recovery Team, a multi-stakeholder recovery team convened by NOAA Fisheries to develop biologically based delisting criteria for listed salmonids under the Endangered Species Act. In addition to her work on salmon recovery planning, Ruckelshaus has worked for more than ten years on marine conservation and reserve design issues. She serves as a trustee on The Nature Conservancy's (TNC) Washington board, is a member of TNC's National Science Council, and is chair of the Science Advisory Board of the National Center for Ecological Analysis and Synthesis (NCEAS). Before joining the National Marine Fisheries Service in 1997, Ruckelshaus was a faculty member in Biology for three years at Florida State University. Ruckelshaus has a bachelor's degree in human biology from Stanford University, a master's degree in fisheries from the University of Washington, and a doctoral degree in botany, also from the University of Washington.
